KRISHNA RAJU S

Electrical & Electronics Engineering Undergraduate

Chennai, Tamil Nadu — +91 8056169089 — krishnarajus2004@gmail.com

LinkedIn: linkedin.com/in/krishnarajus2004

PROFESSIONAL SUMMARY

Electrical and Electronics Engineering undergraduate with hands-on experience in Low Voltage MCC panels, electrical load and feeder calculations, and industrial automation hardware engineering. Experienced in interpreting electrical schematics, performing feeder classification (DOL, VFD, Soft Starter), and supporting panel engineering documentation for industrial projects. Exposure to industrial electrical standards, switchgear coordination, and cross-functional engineering workflows.

CORE ELECTRICAL SKILLS

Low Voltage Electrical Systems — MCC Panels — Control Panels (CP, RIO) — Electrical Load Calculation — Feeder Classification — Power & Current Calculation — Electrical Schematics Interpretation — SLD Understanding — Switchgear Coordination (Exposure) — I/O Card Budgeting — Industrial Electrical Documentation — Engineering Calculations (Excel)

ENGINEERING TOOLS

AutoCAD — MATLAB — Proteus — Tinkercad — MS Excel (Engineering Calculations) — SharePoint (E-documentation)

INDUSTRIAL EXPERIENCE

BUHLER INDIA PVT. LTD. – Bengaluru *Automation Engineering Intern (Automation Hardware Engineering)* *Jun 2025*

- Analysed electrical schematics and project documentation for international (8-10 TPH) and domestic (150 TPD) automation plants
- Performed electrical load calculations, feeder classification, and I/O card budgeting for Motor Control Centre (MCC) panels
- Worked with panel design concepts, switchgear coordination, and industrial electrical documentation practices
- Supported engineering e-documentation workflows using SharePoint

Key Contribution:

- Co-developed a Python-based GUI tool to automate feeder classification, total power (kW), current (A), and I/O budgeting
- Reduced documentation processing time from more than 30 minutes to less than 30 seconds, improving accuracy and standardization

METTUR THERMAL POWER PLANT – Tamil Nadu *Electrical Engineer Intern Jun 2024 – Jul 2024*

- Conducted inspection of electrical systems and components
- Assisted in assessing existing electrical infrastructure and preparing technical reports

SOUTHERN RAILWAY – Chennai *Electrical Engineer Intern* *Jan 2023*

- Supported electrical documentation, reporting, and quality inspection activities

ACADEMIC & INDUSTRIAL PROJECTS

GUI-Based Automation Tool for HWE – Buhler India

- Automated feeder classification, power and current calculation, and I/O estimation for MCC documentation

Intelligent Street Lighting with Automated Fault Detection – Patent (Aug 2025)

- Designed an IoT-based intelligent street lighting system with automated fault detection and dynamic energy management
- Implemented sensor-based illumination control to improve energy efficiency and reduce power wastage

Flood Alerting System – IoT Project (Current Final Year Project 2026)

- Developed an IoT-based monitoring and alert system for early detection of fault conditions
- Implemented automated alert mechanisms to reduce system downtime and improve response time

EDUCATION

B.E. Electrical and Electronics Engineering 2022 – 2026
St. Joseph's College of Engineering, Chennai *CGPA: 8.5 / 10*

LANGUAGES

Tamil (Native) — English (Professional) — Kannada (Limited) — Hindi (Basic)
